

Queens Avenue Surgery

Flu Plan

50 – 64 year olds

Important Information for patients

Following the most recent announcement from the government confirming that eligibility for the vaccine has now been extended to patients aged 50-64, we would like to keep you informed of the current stage in planning.

At this stage our immediate aim is to determine the likely uptake for this new cohort of patients. In order to do this, we have sent a text message/email to all patients in this group asking for an immediate response of **yes** or **no**. If patients do not respond within a set time frame, we will assume patients wish to decline.

Once we have determined the uptake and **more importantly been able to secure sufficient vaccines**, we will update patients via text message/email **or** on the surgery website regarding the booking process.

If you are eligible and have not received a text/email from the practice, then please contact the admin team on 01305 751331/751332.

Please ensure we have your correct mobile and or email address. We would encourage patients who don't currently have Online Patient Access to download the NHS App which will enable appointment booking once appointments become available.

Thank you for your patience, co-operation and understanding.
